

**[TX3] Series**

TELEPHONE/CARD ACCESS SYSTEMS

Features

- No Subscriber Line (NSL) system that does away with monthly phone bill
- Starter kit for 12 residents that can be expanded with additional hardware (refer to ordering information)
- Kit comes complete with a Universal Series slim line enclosure, Master NSL relay cabinet, relay card(s), relay cable(s), RJ-71C punch down block(s) and transformers.
- Lobby enclosure features a stainless steel front panel, built-in rain hood, 4 x 20 backlit LCD display, backlit 16 digit keypad and provisions for a postal lock and color camera
- Multi-lingual Display and Voice Greeting (English, French-Canadian and Spanish) that provides instructions on how to use entry panel
- Built-in Call Waiting feature
- Distinct Suite Telephone Ring Pattern
- Concierge/Security Desk/Guard Phone capability
- Card Access Interface
- Dials up to 18 digit telephone numbers
- System can be configured locally using the keypad or a computer with the TX3 configuration software
- Upload/download configuration files without taking the whole system offline
- Programming from one location
- Remote programming requires a computer equipped with a modem and a TX3-MDM modem module installed in the lobby unit
- Industry Canada and F.C.C. approved

Applications

- Provides resident/visitor access control for small condominiums, apartment buildings, office buildings, gated communities and industrial buildings that do not have a dedicated phone line
- Slim design is ideal for applications with limited space, or for applications where a separate directory exists or is not required
- Surface, semi-flush or pedestal mounting options (Optional adapter plate required to mount to a standard gooseneck post)

Description

Mircom's TX3-NSL-12K Telephone Access Kit is designed to provide Resident/Visitor access control to provide primary resident/visitor access control for small condominiums, apartment buildings, office buildings, gated communities and industrial buildings that do not have a dedicated phone line or do not want to incur the cost of a dedicated line.

The TX3-NSL-12K starter kit comes complete with a Universal Series slim line enclosure, Master NSL relay cabinet, relay card(s), relay cable(s), RJ-71C punch down block(s) and transformers to support 12 residents/users. The system can be expanded with additional hardware. (Refer to the ordering information).

The NSL kit features a TX3-200-4U Universal Series slim line lobby enclosure that is constructed of a heavy gauge stainless steel for use in a lobby or outdoors. The enclosure features a built-in rain hood, microphone, tamper resistant speaker and has provisions for a postal lock and color camera to be installed. The slim line design is ideal for applications with limited space, or for applications where a separate directory exists or is not required. Surface, semi-flush or pedestal mount applications are supported.

The TX3-200-4U lobby enclosure features a back-lit 4 line by 20 character electronic LCD display that scrolls a programmable banner message as well as the resident names and dial codes. The system also features a 16 digit back-lit telephone style keypad with dedicated operational buttons for Page Up, Page Down, Call and Info.

NOT TO BE USED FOR INSTALLATION PURPOSES.

Mircom reserves the right to make changes at any time without notice in prices, colours, materials, components, equipment, specifications and models and also to discontinue models.

TX3-NSL-12K system also features a configurable multilingual display and voice prompts (choice of English, Spanish, or French-Canadian) that provide instructions on how to use the system .

The TX3-NSL-12K uses the No Subscriber Line (NSL) system, which does not require a dedicated phone line. This eliminates the monthly phone bill and provides the call waiting feature to all residents/suites on the system.

The TX3 system is programmable via the built-in keypad or using a computer with the optional TX3 configuration software. In addition the system can also be configured remotely using the TX3 configuration software and the TX3-MDM Modem Module.

The TX3 system utilizes hands-free, full duplex telephone communications between residents and visitors for granting access into the building.
